Homework-0!
Cloud Computing 17
Due: Sep 29th in class!

Install Hadoop on your laptop in the Pseudo-Distributed mode and run a word count example.

Output:

1- Bring your laptop with the installation to class on Friday Sep 29th.
2- The instructor will check to see if all the Hadoop daemons are running and that you can transfer data between the local file system and HDFS.
3- Run the word count example and show the output.
4- Your activity in Piazza will also be a part of your grade, so help your friends with their installation.
5- **For this assignment only**, you are encouraged to help each other!
